Weight Capacity and Graduation

Depending on the model, the M202 can handle weights typically up to:

- 20 kg (44 lbs)
- 30 kg (66 lbs)

Graduations are often set at 50 grams or 0.1 pounds, allowing for accurate measurements needed in professional settings.

Adjustable Zero and Calibration

One of the critical features of the manual M202 is its adjustable zero mechanism. Users can calibrate the scale to ensure accuracy before each use, which is vital in high-precision environments. Calibration is straightforward:

- Use the calibration knob or screw located at the side or back
- Place a known weight on the platform
- Adjust the dial until the pointer aligns with zero or the correct weight

This manual calibration process helps maintain measurement integrity over time.

Operation and Usage

Setup and Calibration

Getting started with the Avery Berkel M202 involves minimal setup:

- Place the scale on a flat, stable surface.
- Check for level positioning; use the adjustable feet if available.
