- Ground Wire: Completes the circuit, typically connected to the vehicle's chassis.
- Tail Light Modules: Housing the bulbs and sometimes integrated LED boards.
- Connectors and Socket Assemblies: Connect wiring harnesses to the bulbs and modules.

In a typical Dodge Ram, the wiring harness runs from the vehicle's main wiring loom to each tail light assembly, often via multi-pin connectors that facilitate easy removal and replacement.

Wiring Diagram Overview

Understanding the wiring diagram is vital:

- Connector Pins: Typically, a 4- or 5-pin connector per tail light assembly.
- Pin Assignments:
 - Ground: Usually black or white wire.
 - Tail Light (Running Lights): Usually brown or yellow.
 - Brake Light: Usually red.
 - Turn Signal (Left/Right): Usually green (left) and orange (right).
 - Reverse Light: Usually light blue or white with a blue stripe.

The wiring color codes can vary between model years and configurations, so always verify with a wiring diagram specific to your Dodge Ram's year and trim.
