Dear Dr. Smith,

Re: Referral for Mr. John Doe ? Chronic Lower Back Pain

I am pleased to refer Mr. John Doe, a 45-year-old male patient whom I have been treating for the past six weeks for chronic lower back pain. The purpose of this referral is to provide a summary of his condition, the treatments administered, and to seek your guidance regarding further management.

Patient Information:

- Name: John Doe
- DOB: 01/15/1978
- Gender: Male
- Contact: (555) 123-4567

Medical History:

Mr. Doe reports a history of intermittent lower back discomfort over the past two years, exacerbated by prolonged sitting and physical activity. He has no prior surgeries related to the back, but he has a history of mild lumbar scoliosis. He is not currently on any medications, and there are no known allergies.

Presenting Complaints:

Mr. Doe reports persistent dull ache in the lumbar region, rated 4-6/10 on pain scale, occasionally radiating to the left buttock. The pain worsens with sitting for more than 30 minutes and improves slightly with movement. He also reports muscle stiffness and limited range of motion in the lumbar spine.

Assessment Findings:

- Palpation revealed taut paraspinal and quadratus lumborum muscles.
- Restricted lumbar flexion and extension, with pain at end ranges.
- No neurological deficits observed.

Treatment Provided:

Over six sessions, I employed a combination of Swedish massage, myofascial release, and deep tissue techniques focusing on the lumbar and pelvic muscles. Each session lasted approximately 60 minutes. Mr. Doe responded well, with noticeable reduction in muscle tension and pain levels decreasing to 2-3/10. He was advised to perform stretching exercises and maintain ergonomic practices.

Recommendations:

Given the chronic nature of his symptoms and muscular findings, I recommend further assessment by a medical professional, possibly imaging, to rule out structural issues. Continued physiotherapy or chiropractic care might be beneficial. It is also advisable for Mr. Doe to consider a tailored exercise program to strengthen core muscles and improve flexibility.

Precautions:

Please be aware that Mr. Doe experiences discomfort with excessive lumbar extension; thus, any movement or intervention should be approached cautiously.

Please feel free to contact me for further details or clarification. I am happy to collaborate in his ongoing care.

Sincerely,

[Your Name], LMT
