They act as thresholds that separate grade bands such as 9-1 in recent reforms based on student performance. For OCR's GCSE Additional Science, these boundaries are carefully calibrated each assessment cycle, considering factors such as question difficulty, student performance, and exam standards.

The Role of Grade Boundaries

Grade boundaries serve several critical functions:

- **Transparency:** Providing clarity for students and teachers on what scores are necessary for specific grades.

- Qualification: Allowing schools and colleges to determine the achievement levels of their students.

How Are Grade Boundaries Set by OCR?

The Standard-Setting Process

OCR employs a meticulous process to establish grade boundaries, combining statistical analysis with expert judgment. The key steps include:

- Exam Paper Standardization: After each exam, examiners review the question paper to assess overall difficulty.
- Marking and Data Collection: Student responses are marked according to detailed mark schemes, and data on student performance is compiled.
- Statistical Analysis: Using methods like Item Response Theory (IRT), OCR analyzes score distributions to identify natural breaks between performance levels.
